CleanRouter
MeshNode

Simple
Quick Start Guide

Please check out our extended setup guide and video online. It's great for beginners!
http://Support.CleanRouter.com

Please Note: Steps 1 and 2 below must be completed for EACH Mesh Node.

① Connect

Mesh Node

Clean Router

to modem

to power outlet
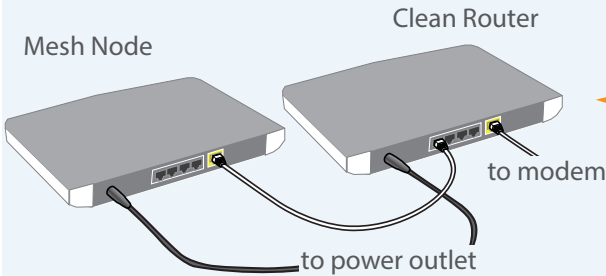

a) Connect the Mesh Node to the Clean Router as illustrated.

b) Power on the Mesh Node.

c) Watch lights on the front of the Mesh Node.

② Wait for Setup to Complete

a) Lights flashing 1, 2, 3, 4 in sequence indicates setup has started.

b) Alternating flashing of lights 1 and 4 indicate that setup is complete.

c) After setup is complete unplug the Mesh Node and move it to another location.

d) One minute after powering on the Mesh Node verify that light 2 is solid on - NOT flashing.*

* If light 2 is flashing then the Mesh Node may need to be moved closer to another node.
